HIVE CHALLENGE: EDITION 2

PARTICIPANT HANDOFF DOCUMENT

JULY 23, 2026

I. CORE SYSTEM SPECIFICATIONS

Superficial features will not compensate for structural failure. Your architecture must natively support the following mechanical requirements:

- **Faculty & Student Dashboards:** Faculty and student attendance dashboards for real-time tracking and monitoring.
- **Automated Attendance Reports:** Automated attendance compilation and scheduled reporting delivery.
- **Biometric & QR Integration:** Biometric or QR-based attendance integration at the door.
- **Low Attendance Alerts:** Alert system for low attendance tripping automated notifications.
- **Attendance Log & Edits:** Log integration in the attendance system with edit options for records.
- **LTP Session & Schedule Sync:** Session integrated properly (LTP) directly from schedule with cover up classes.
- **Student Attendance Profiling:** Student profiling based on attendance patterns and analytics.
- **Role-Based Access Management:** Role-based access management ensuring secure user permissions.
- **Report Generation:** Flexible multi-format report generation engine for institutional data.

II. TIMELINE & MILESTONES

DATE	MILESTONE	DESCRIPTION
July 23	**Orientation**	Kickoff, problem briefing, and roster onboarding.
July 30–31	**Architecture Defense**	1-page architecture, data models, and sequence diagram review.
August 11	**Hive Talk Tuesday**	Technical check-in session, progress review, and Q&A.
August 18	**Heuristics Eval**	Usability evaluation, edge-case testing, and system audit.
August 27	**Final Demo Day**	Live demonstrations, evaluation, and winner selection.

"You do not rise to the level of your goals. You fall to the level of your systems."

— JAMES CLEAR
